- (1) Adjusted EBITDA, Adjusted Net Income, Adjusted EPS, Free Cash Flow, and Net Debt are non-GAAP financial measures. See "Non-GAAP Financial Measures" for additional information on non-GAAP financial measures and a reconciliation to the most comparable GAAP measures.
- (2) We have not reconciled Adjusted EBITDA and Adjusted EPS outlook as non-GAAP measures to the most comparable GAAP measures because it is not possible to do so without unreasonable efforts due to the uncertainty and potential variability of reconciling items, which are dependent on future events and often outside of management's control and which could be significant. Because such items cannot be reasonably predicted with the level of precision required, we are unable to provide outlooks for the comparable GAAP measures. Forward-looking estimates of Adjusted EBITDA and Adjusted EPS are estimated in a manner consistent with the relevant definitions and assumptions noted herein.

NON-GAAP FINANCIAL MEASURES

The following information provides definitions and reconciliations of the non-GAAP financial measures presented in this earnings release to the most directly comparable financial measures calculated and presented in accordance with generally accepted accounting principles (GAAP). The company has provided this non-GAAP financial information, which is not calculated or presented in accordance with GAAP, as information supplemental and in addition to the financial measures presented in the earnings release that are calculated and presented in accordance with GAAP. Such non-GAAP financial measures should not be considered superior to, as a substitute for or alternative to, and should be considered in conjunction with, the GAAP financial measures presented in the earnings release. The non-GAAP financial measures in the earnings release may differ from similarly titled measures used by other companies.

Adjusted EBITDA

Adjusted EBITDA is considered a non-GAAP financial measure under the SEC's rules because it excludes certain charges included in net income (loss) calculated in accordance with GAAP. Management believes that Adjusted EBITDA is a meaningful measure to share with investors because it best allows comparison of the current period performance with that of the comparable period. In addition, Adjusted EBITDA affords investors a view of what management considers Petco's operating performance to be as well as the ability to make a more informed assessment of such operating performance as compared with that of the prior period.

Please see the company's 10-K filed on April 5, 2021 for additional information on the reconciliation of Net Income (Loss) Attributable to Class A and B-1 Common Stockholders to Adjusted EBITDA. The tables below reflect the calculation of Adjusted EBITDA for the thirteen weeks and trailing twelve months ended May 1, 2021 compared to the prior year quarter and twelve-month period ended May 2, 2020, respectively.

Adjusted Net Income and Adjusted EPS

Adjusted Net Income and Adjusted diluted earnings per share attributable to Petco (Adjusted Net Income and Adjusted EPS respectively) are considered non-GAAP financial measures under the SEC's rules because they exclude certain amounts included in the net income (loss) attributable to common stockholders and diluted earnings per share attributable to Petco calculated in accordance with GAAP (net income (loss) and EPS respectively), the most directly comparable financial measures calculated in accordance with GAAP. Management believes that Adjusted Net Income and Adjusted EPS are meaningful measures to share with investors because they best allow comparison of the current period performance with that of the comparable period. In addition, Adjusted Net Income and Adjusted EPS afford investors a view of what management considers Petco's earnings performance to be as well as the ability to make a more informed assessment of such earnings performance with that of the prior period.

Free Cash Flow

Free Cash Flow is a non-GAAP financial measure that is calculated as net cash generated by operations less cash paid for fixed assets. Management believes that Free Cash Flow, which measures the ability to generate additional cash from business operations, is an important financial measure for use in evaluating the company's financial performance.

Although other companies report their Free Cash Flow, numerous methods exist for calculating a company's Free Cash Flow. As a result, the method used by Petco's management to calculate Free Cash Flow may differ from the methods used by other companies to calculate their Free Cash Flow.

The following table sets forth a reconciliation of Free Cash Flow to net cash provided by (used in) operating activities, which Petco believes to be the GAAP financial measure most directly comparable to Free Cash Flow. The table below reflects the calculation of Free Cash Flow for the thirteen weeks ended May 1, 2021 compared to the prior year quarter ended May 2, 2020.

(In Thousands)	13 Weeks Ended

Free Cash Flow	\$ 67,651	\$ (60,184)

Net Debt

Net Debt is a non-GAAP financial measure that is calculated as the sum of current and non-current debt, less cash and cash equivalents. Management considers this adjustment useful because it reduces the volatility of total debt caused by fluctuations between cash paid against the company's revolving credit facility and cash held on hand in cash and cash equivalents.

Although other companies report their Net Debt, numerous methods exist for calculating a company's Net Debt. As a result, the method used by Petco's management to calculate Net Debt may differ from the methods used by other companies to calculate their Net Debt.

The following table sets forth a reconciliation of Net Debt, to total debt, which Petco believes to be the GAAP financial measure most directly comparable to Net Debt. The table below reflects the calculation of Net Debt as of the period ended May 1, 2021 compared to the prior year quarter ended May 2, 2020.

Adjusted EBITDA, Adjusted Net Income and Adjusted EPS Footnotes

- (1) Mexico Joint Venture EBITDA represents 50% of the entity's operating results for all periods, as adjusted to reflect the results on a basis comparable to Adjusted EBITDA. In the financial statements, this joint venture is accounted for as an equity method investment, and reported net of depreciation and income taxes. Because such a presentation would not reflect the adjustments made in the calculation of Adjusted EBITDA, we include the 50% interest in the company's Mexico joint venture on an Adjusted EBITDA basis to ensure consistency. The table below presents a reconciliation of Mexico joint venture net income to Mexico joint venture EBITDA.

- (2) Non-cash occupancy-related costs include the difference between cash and straight-line rent for all periods. Beginning in fiscal 2019, in connection with our adoption of the lease accounting standard, favorable lease rights of \$125.2 million and unfavorable lease rights of \$30.8 million were reclassified from intangible assets and other long-term liabilities, respectively, to right-of-use lease assets and the related amortization is now included in non-cash occupancy costs. In addition to the reclassification, the amortization period of these lease right assets has decreased to align with the terms of the underlying right-of-use lease assets, thus resulting in an acceleration of expense compared to prior years. The overall adoption of the lease accounting standard did not have an impact on our Adjusted EBITDA, as this increase in addback was completely offset in other impacted lines such as lower depreciation and amortization, asset impairments and write-offs, and store closing expenses.
- (3) Non-recurring costs include: unrealized fair market value adjustments on non-operating investments; class action settlements and related legal fees; one-time consulting and other costs associated with our strategic transformation initiatives; discontinuation and liquidation costs; and costs related to the initial public offering. While we have incurred significant costs associated with the COVID-19 pandemic during fiscal 2020, we have not classified any of these costs as non-recurring due to the uncertainty surrounding the pandemic's length and long-term impact on the macroeconomic operating environment.
- (4) We define net margin as net income (loss) attributable to Class A and B-1 common stockholders divided by net sales and Adjusted EBITDA margin as Adjusted EBITDA divided by net sales.
